

A Guide to Getting it:
Remarkable Management Skills

A Note from the Editor

If you just picked this book up in the Business section of your local bookstore, you probably could have chosen any one of literally dozens of other books on the topic of management. What makes this book different is that the ideas and tools presented here come from the view of ten Business Coaches. Their perspectives provide reminders that when we approach the role of leader with openness, trust, and caring, we can be truly inspiring and remarkable managers.

This book is the third book in a series of books written by Life and Business Coaches that offer invaluable insights, examples, and exercises as guides to help the reader improve their business and personal life.

I invite you to read, explore and enjoy!

Marilyn Schwader, Editor
